

AMENDMENTS TO THE CLAIMS:

Claims 1-13 (canceled)

Claim 14 (new): An adjusted securing rack for a plasma TV comprising a base seat, an adjustable plate and a suspension plate, wherein the base seat includes a base plate having the circumferential edge bent with a L-shaped edge plate and the circumferential face of the edge plate is provided with adjusting holes and a bottom seat is locked to concrete wall; the adjustable plate having an L-shaped cross-section having a top and bottom end provided with locking hole corresponding to the adjusting hole of the base seat, and the adjustable plate having an upright bottom end is provided with a screw hole and the top end is formed with at least one adjusting hole, and cross-section of the suspension plate is an L-shaped steel and the upright side plate has a top and a bottom end which respectively forms into downward opened top notch and bottom notch, and the horizontal side plate of the suspension plate is formed with a plurality of adjusting holes, thereby, horizontal adjusting holes on the side plate of the bottom seat are for the securing of the adjustable plate and the adjusting plate locks the suspension plate and a plasma TV is mounted to the suspension plate.

Claim 15 (new): The securing rack of Claim 14, wherein the side plate of the circumferential edge of the base plate is welded so that an arch-shaped steel structure is obtained.

Claim 16 (new): The securing rack of Claim 14 wherein the various corners of the base plate are provided with a plurality of through holes and elongated holes for mounting onto concrete wall or wooden wall.

Claim 17 (new): The securing rack of Claim 14 wherein the top plate is bent to form a leaning plate which can lean against the top face of the side plate of the base seat to support the downward weight of the adjusting plate.

Claim 18 (new): The securing rack of Claim 14, wherein the number of adjusting holes at the upright side plate of the adjusting plate is three so as to increase the angle of adjustment.

Claim 19 (new): The securing rack of Claim 14, wherein the adjusting hole of the horizontal side plate of the suspension plate is an elongated hole.

Claim 20 (new): The securing rack of Claim 14, wherein horizontal shaft line and vertical shaft line of the base plate are provided with a plurality of through hole module so as to horizontally or uprightly suspend the base seat to the ceiling.
